

Autoimmune Disorder

9/23/2016

Here's my testimony.

I was given an autoimmune diagnoses. I was always tired, fatigue, weak muscles some atrophy. I've been sick for 7 yrs and declining. I tried numerous therapies and also medication that made things worse. There are no words to express how grateful I am to have met Dr. Lin, he truly is a hero to me and my family. I've been getting treated for about 3 months and have seen a drastic change. I'm able to get out of bed on my own again, I'm absorbing nutrients and gaining weight, I am able to walk without holding onto people, I went to an amusement park with hills and was able to walk around without resting. This is life. Although I have a long road to recovery this treatment will heal me.

- Filomena Sakellis

Remark: Dr. Lin Does Not Treat a specific condition, instead of helping the body's natural Self-Healing and Self-Regulating functions.
