

Breast Cancer

12/30/2016

Dr Lin,

I want to thank you for your yes you gave to Our Lord, Our Creator, to your calling to heal His wounded children. I know that you don't take any credit. Yes, I do agree with you The Lord is our healer but you are His instrument and The Lord has giving you a great gift which you respect and are using it very well. Your dedication and heartfelt loving care you give to all your patients creates a healing environment of its own.

After going through breast biopsy and radiation, I knew that it has to be a better way. I was certain that chemotherapy was not the way I wanted to go. With the help of Our Lord and my friend Loretta we found you.

The moment I saw your website I knew I could put my trust in you to be my healthcare partner. After my first visit I knew you were the answer to my prayers. The body scan you did on me confirmed that chemotherapy was not what my body needed. My body had many organs that were not performing to its full potential. It needed healing, have the proper oxygenation, nutrition and supplementation so it could be restored to normalcy, and performs the way God intended to. So I completed radiation on a Tuesday, I was in your office on that Thursday, ready to start my healing process. I took my first treatment, started on the supplements you provided, and before bedtime I applied the cream you prepare for me. Radiation had done a lot of damage and I was in severe pain. That night was the first time I was able to get some sleep. Pain caused by the radiation damage had subsided 75%. Before I got out of bed, I texted you with a heart full of gratitude. What a relief it was to be able to text my doctor. This was the first for me. I was not alone. My doctor is just a text away.

The skin was healed within a week. After three months, the large lump of scar tissue at the incision site caused by the radiation was gone. My blood sugar levels were improving. Energy level is rising.

After four months, sugar levels had gone from 190s to lower 110s, had a lot more energy, great skin color. People were surprised how great I look and

how active I'm in my community. The follow up sonogram is clear; they did not find the tumor that was left. My surgeon was surprised but still skeptical. Said she did not find anything abnormal. Wants to see me in a year.

Thank you again, Dr. Lin

Forever grateful,

- Dora Avallone

Remark: Dr. Lin Does Not Treat a specific condition, instead of helping the body's natural Self-Healing and Self-Regulating functions.
