

Hodgkin's Lymphoma

10/09/2018

I came to see Dr. Lin in June 2018 with a diagnosis of Hodgkin's Lymphoma stage II. Dr. Lin from the beginning was very helpful and took his time with me during our first visit answering all my questions and concerns in a 2 and a half hours long first visit. At the time I was dealing with a lot of pain in my chest, a very bad cough and pain every time I sneeze. It was all due to the tumors in my chest and lymph nodes. I had a tumor in my chest that was the size of a tennis ball and a lymph node in my neck the size of a golf ball, plus some other lymph nodes that also have cancer activity that came up in my first pet scan. After 2 weeks into my treatment Dr. Lin made a special cream for me that he instructed I put 3 to 4 times in my chest area where I had the pain and on the tumors themselves. At the time my pain was so severe that I was taking Tylenol every single day 2 times per day and sometimes 3 times per day. But as soon as I started using the cream my pain got under control to the point that I never had to take the Tylenol again. It started to reduce the pain and within a couple days it took away my pain completely. Now after following Dr. Lin strict protocol of supplements along with ozone therapy and the electric therapy 4 to 6 days a week plus completely changing my diet to a strict vegetables, fish and fruits only diet, I am happy to report that 3 months later I am 90% cancer free. I had my last pet scan in August 31, 2018, it showed that the only tumor left is the one in my chest which was the biggest one, but It got reduce from 29 centimeters to 7 centimeters. Before in my first pet scan I had the tumor in the lymph node in my neck, the one in my chest, I had under my arm pit in both arms, and also more lymph nodes under my chest. All the others were completely gone in 3 months and just a little bit of the one in my chest is left. I am very happy with everything Dr. Lin has done for me and I continue to see him to keep working on getting rid of that last 10 percent. But I can say with confidence, Dr. Lin was the right doctor to help me treat my Hodgkin's lymphoma and I guarantee he will be the right for you.

Thank you again,
Luis Gonzalez
