

## **Cystic Acne**

**8/11/2018**

As those who suffer from acne well know the experience can be very frustrating. We are constantly bombarded with television commercials, infomercials, radio ads and all types of propaganda offering solutions. I had personally lived this nightmare. You get to the point where you try all types of thing (cosmetic procedures, acupuncture, etc.) but you still wind up with either a temporary solution or no change at all. After years of searching for cure I finally found a doctor who put an end to my misery. Dr. Chun Ming Lin took his time to educate me on what works for me and he will do the same for you because he treats every patient with personalized care. I know this because he has a procedure which include an electronic body check. The whole experience has been very educational and I came out of the doctors office knowing exactly what I need to take to better my condition. It has been a month now and I no longer have painful cystic acne. In addition to being a professional in his practice Dr Chun Ming Lin still shows huge concern and have always been open for conversation regarding helping me on my journey. I highly recommend him.

Haydee B.

***Remark: Dr. Lin Does Not Treat a specific condition, instead of helping the body's natural Self-Healing and Self-Regulating functions.***
