

Tachycardia, Chronic Obstructive Pulmonary Disease

4/13/2020

This is a testimonial for Dr. Chun Ming Lin. He is a caring doctor who listens and never rushes any of my visits, something that is rare to find with many other medical doctors. On each of my visits, he always asks about my health and how I feel. If I have any questions, he never hesitates to answer them and educates me further to help me achieve my optimum health.

Many people have doubts about the various treatments that Dr. Lin offers at his practice. I would like to describe a recent incident where Dr. Lin's treatment saved my life. I was experiencing rapid heart rate and shortness of breath. After climbing a flight of stairs, I was out of breath. I couldn't walk more than a few steps without experiencing shortness of breath. My thought at that time was to go to the emergency room, but since I had an appointment with Dr. Lin that day, I decided to go for a treatment before making a decision. I went in for an hour of electrotherapy. Miraculously, when I walked out of the office, I felt almost completely back to normal. I couldn't believe how one treatment improved my condition so drastically. If it wasn't for Dr. Lin's treatment that day, I believe I would have been admitted to a hospital.

I believe my body can heal when I treat it using natural methods. Dr. Lin's philosophy aligns with my belief and I have been blessed to have found him so he can help me to maintain my health in the most natural way. I would recommend Dr. Lin without reservations.

Dear Dr. Lin

Thank you for your time and compassion. You go above and beyond to help people with life threatening diseases and that is why I would rather come to you. Your machines are far more superior and effective than all others that I have used and been on at home. It truly works as you claim. And no side effects like drugs. You at least spend an hour with us, not 10 minutes like most medical doctors. I'd know that you're officially closed, but you go out your way for me. You are truly God's gift for us. Many people has not found their purpose in life, but you truly have. Thanks a lot

Let me know anytime you're in your office, so I can drop by for a maintenance sessions.

Arthur Ng

Remark: Dr. Lin Does Not Treat a specific condition, instead of helping the body's natural Self-Healing and Self-Regulating functions.
