Hi Dr. Lin,

My son, Dean, his blood work was very good last week. For many years, this is the first time his blood work shows normal. I can't even express how much my son wants to be free, independence, freedom, joy, love, bliss, laughter, eating all. Holmsom do what he wants, he cries over it. If anyone can help I think it is you. Please, you are a pharmacist, scientific doctor and you can help Dean to recover. He cries over himself.

1/4/2017

Blood work was still very good again taken yesterday. I thank you for your knowledge helping Dean in all your intelligence. Let's get him to walk and breathe on his own. My son and myself want to have fun after he gets well. Thank you again, Dr. Lin

Remark: Dr. Lin Does Not Treat a specific condition, instead of helping the body's natural Self-Healing and Self-Regulating functions.
