

Kidney Failure, Diabetes, Hypertension

1/25/2015

This is my Story.

My name is Clarence Grant. I have been sick with various ailments for over 40 years, including diabetes, kidney failure, high cholesterol and a whole lot of other ailments. I am 78 years old, so I came to accept that some of my sick feelings were age related.

I have been on dialysis for the last 5 years. I get treated at the center 3 times a week for 4 hours each time and by the end of each treatment, I felt close to death. I was always a physically strong person, and did construction work for years, but these ailments weakened me and over the years I gradually got worse. I bent slightly forward when I stood. If I was sitting, I had to hold on to something with both hands to get up. When I tried to walk one block, I had to stop 3-4 times to catch my breath. Every time I ate, I become bloated. My digestive system was totally off balance. My lower back was in so much pain, I could not stand for more than 4 minutes. Several time while receiving dialysis treatment, my blood pressure got so low, I passed out and had to be given oxygen.

During this entire period, I had been going to doctors of every kind and all kinds of specialists. As a matter of fact, I worked in a hospital for 31 years with easy access to doctors, yet things got progressively worse.

Then, on 9/20/14, a daughter-in-law of mine told me about Doctor Lin. I made an appointment the very next day on 9/21/14. Dr. Lin asked me who referred me. I told him my daughter-in-law, and that my wife came with me to the appointment.. Dr. Lin gave me an electrical probe to hold in my hand. The device was connected to a computer, and after ½ hour, he gave me a printout of several pages of information telling me everything that was off balance in my body, along with the treatment I would need. My wife was so impressed with what she saw, she decided to take the test and get a readout on herself.

To our surprise, Dr. Lin informed us that the medical insurance did not cover the treatment. This treatment is completely different from anything I have ever experienced in my 78 years. It is designed to remove the acidity and increase the alkalinity in my body. Dr. Lin says 'He is recharging our battery'.

Amazingly, in a little over two months, my blood pressure is normal and my overall feeling is unbelievable. I can stand without holding on to anything. I can walk a few blocks without losing my breath, and I can eat without bloating.

When I started with Dr Lin, a doctor at the dialysis center asked why my legs were shown so much water retention. I told him I was detoxifying my body. He was mad and up my dry weight, which left me feeling more sluggish after every dialysis treatment. However, 3 weeks later, after my blood work showed improvement, the same doctor told me 'continue to do whatever I was doing to get better'.

One of the patients at the dialysis center also asked me what I was doing. When I asked her why, she said 'she noticed the difference, when I stand, when I walk, all my features looked different and I looked like I was getting younger'.

I realize that I have been helped immensely and I truly cannot understand why treatment like this is readily available not covered by insurance. It is truly life saving and has absolutely improved my quality of life. I cannot thank Dr. Lin enough!!!

- Clarence Grant

Remark: Dr. Lin Does Not Treat a specific condition, instead of helping the body's natural Self-Healing and Self-Regulating functions.
