

**Kidney Failure, Stomach Cancer, Esophagus Ulcer
and High Blood Pressure**

5/21/2014

In kind, I, J.D, will like to briefly put into words to show my token of appreciation for the help of the treatment Dr. Lin has given me. It's been about 8 weeks of goodness, I was diagnosed with stomach cancer, kidney failure along with an esophagus ulcer and high blood pressure.

I was referred to Dr. Lin by a friend and now I refer Dr. Lin as the miracle doctor. The treatment of natural, electronic therapy, an basic method strengthening my kidneys has helped me to get off 3 times a week kidney dialysis.

My high blood pressure, stomach cancer and esophagus ulcer have been improved very much without taking different pills.

In closing, I like to say it's very nice to have such a doctor with a sense of beauty with the human body, also one that cares....

Thank You !!!!!

- J.D

Remark: Dr. Lin Does Not Treat a specific condition, instead of helping the body's natural Self-Healing and Self-Regulating functions.
