April 8, 2002

Mr. Sidney _____
_____ E. Country Club Drive,
Aventura, FL 23318

Dear Mr. _____

Just a brief note to review the pathology following transurethral resection of some prostate tissue on April 2nd 2002. Your prostate contained a high grade urothelial carcinoma which invaded into the prostate. Further studies are being performed to determine that this is a urothelial carcinoma and not an adenocarcinoma of the prostate.

Once I have this information, we can decide about the best approach to further treatment. I will discuss this with you in the office.

Sincerely,

MARK S. SOLOWAY, M.D.
